

ASSURED COMFORT™

Introducing
The Ultimate Adjustable Bed

Assured Comfort™ is setting new ergonomic standards! This is the ultimate bed for comfort and restful sleep. Originally designed and used in health care environments, the Assured Comfort™ bed is entering the market by popular demand. Refined for function first, plus solid wood headboards and footboards, these beds are available in four sizes: twin, full, queen, and split king.

An adjustable bed, innovatively redesigned, is construction savvy where each electric frame is robotically welded using lightweight aluminum for consistent durability and quality. They are totally manufactured in the USA as the premier bed for wellness and home health care. These beds are adapted from products currently being used in medical facilities and in home care across the United States.

The mattresses rest on an electric frame with whisper quiet head and foot adjustability. All beds are available with your choice of attractive head and foot board in two styles and two woods. Each piece is handcrafted in Virginia using the highest quality, rich solid hardwoods.

Assured Comfort™ is the ultimate adjustable bed, with versatile options, for a great night's sleep.

Sweet Dreams! From the crew at Assured Comfort™.
